“OUTERWEARS” PRE-FILTERS

“Outerwears” are designed to keep the bigger and most damaging particles of sand, dirt, clay and oil dry from getting to and clogging the fins of your air cleaner element. “OUTERWEARS” unique polyester material contains uniform micron sized openings. These openings allow air in, yet filters out the very elements that will eventually clog your air filter. Keeping your engine running smooth and clean all the way to the checkered flag. “Outerwears” Pre-filters simply stretch on over the existing air cleaner casing or element and may be washed up in soap and water. Gas or solvents may be used on tougher oil stains.
